OUR WATERSHEDS OUR RESOURCES: DANA POINT COASTAL STREAMS WATERSHED

A watershed is the land area that channels rainfall to creeks, streams, rivers, and eventually to reservoirs, bays, and the ocean.

All of Orange County is located in a watershed!

The Dana Point Coastal Streams Watershed is 1 of 11 watersheds in Orange County.

This six square mile watershed starts north of Salt Creek and includes all or part of three cities including Laguna

Niguel, Laguna Beach, and Dana Point.

There are also facilities managed by the

Orange County Flood Control District in this watershed. Salt Creek is also its largest waterway and flows throughout the watershed to meet the Pacific Ocean at Salt Creek Beach. Whether you're admiring the bluffs at Thousand Steps Beach or hiking throughout Dana Point Headlands Conservation Area, you're enjoying the Dana Point Coastal Streams Watershed's resources.

The Dana Point Coastal Streams Watershed is only as healthy as we make it. By taking simple actions in our homes and communities we can all help the Dana Point Coastal Streams Watershed thrive!

YOU ARE THE SOLUTION TO RUNOFF POLLUTION

Runoff pollution can harm our creeks, rivers, bays, and ocean. Unlike the sewer system, which treats waste water from inside our homes and businesses, **anything that goes into the storm drain system flows untreated into our waterways.** Most OC residents value clean waterways, so it's important to join your neighbors and do your part to protect our water resources.

In the Dana Point Coastal Streams Watershed, our top priority is preventing pollution from bacteria and pesticides. These pollutants can occur from everyday actions like walking your dog or maintaining your landscape. When not properly managed, rainwater and irrigation runoff can transport these pollutants to our waterways where they can impact aquatic life and human health. Here are some simple ways to protect our watershed:

Racteria

(from pet waste and sewage spills)

- Carry bags when walking pets and dispose of pet waste in a covered bin.
- Pick up pet waste in your yard at least once a week and before any forecasted rain events.
- Have a licensed plumber create a maintenance plan for your sewer laterals and report sewage spills immediately (see reporting hotline below).

Pesticides

(chemicals in lawn care products)

- Use integrated pest management (IPM) to target specific pests in problem areas instead of widespread chemical use.
 For more information visit h2oc.org/IPM.
- □ If you must apply pesticides, only use the proper amount in accordance with the manufacturer's instructions.
- Apply pesticides when conditions are dry, wind is minimal, and rain is not in the forecast for the next 48 hours.

Help keep our watersheds healthy! If you see any pollution, you can report it by calling the **24-hour Pollution Reporting Hotline: 1-877-89-SPILL (1-877-897-7455)** or **visiting myOCeServices.ocgov.com**.

Who is H₂OC?

 H_2OC is YOU! H_2OC is also a cooperative stormwater program which includes all 34 cities in Orange County, the County of Orange, and Orange County Flood Control District. Visit h2oc.org to learn more about runoff, water pollution, and how you can be the solution to runoff pollution and protect our water resources.
